

## **Project Submission Report- Faris**

### **Task Title**

Integrating backend for the flutter app login

### **Solutions**

1. Created backend app for backend.
2. Checked the working using ThunderClient and PostMan.
3. Backend app is working with Postman but, I don't know how to connect it with the flutter.
4. Secured the DB with Jsonwebtokens and password hashing.
5. Still fixing the connection. We are expecting a proper help from your side.
